for the company:

Podjetje d.o.o.

Ulica 1, 1000 Ljubljana

Company identification number: 1234567000

VAT ID / Tax number: SI12345678

CREDIT RATING ACCORDING TO THE BASEL BANKING STANDARDS

COMPANY CREDIT RATING AS AT ... SB4

The company's ability to settle its obligations is still high, but lower than companies in the third credit rating category. Company with a credit rating score of SB4 presents indicators showing the risk factors for occurrence of a payment default event, which suggest that the probability of a payment default event occurring, assessed by applying the model, is still low. Regardless, on average, the probability of a payment default event in companies with a SB4 rating is higher than with those with a SB3 credit rating.

Credit rating based on the annual report¹ SB3

Auditors's opinion: without reservation

Estimated maximum sustainable indebtedness: 342.206.861 EUR

Actual financial liabilities on 31.12.: 75.831.923 EUR

Changes in credit rating score after 1.1.

GENERAL DESCRIPTION OF THE S.BON AJPES MODEL

S.BON AJPES credit rating model is based on a statistical analysis of the financial statements and occurrence of payment default events for the entire population of Slovenian business entities over a longer period of time. Credit rating assessment complies with Basel II banking regulation. For each business entity is a measure of the overall probability payment default over a period of 12 months after the date of the financial statements of the entity. **Payment default event** is defined as the occurrence of at least one of the following events: initiation of bankruptcy, compulsory composition or compulsory liquidation. Transaction accounts blocks and court notices issued for a business entity and its subsidiaries, data and information from the audited annual reports and auditors' opinions are taken into account when updating credit rating during the year or after credit rating scores have been assigned based on the annual report. **S.BON AJPES credit rating scale** classifies Slovenian business entities in 10 grades with ratings from SB1 to SB10, with SB1 as the highest score on the credit rating scale. Special credit rating SB10d is assigned to business entities to which payment default event has actually occurred. A more detailed description of the S.BON AJPES credit rating model is available on the website of AJPES (www.ajpes.si/Bonitetne_storitve).

ESTIMATED MAXIMUM SUSTAINABLE INDEBTEDNESS

The estimated maximum sustainable indebtedness complements the information on the credit rating. The credit rating is based on the estimated probability of default event, but does not give information about size of the business entity. The credit rating is complemented with the estimated maximum sustainable indebtedness which is expressed in absolute value and thus reflects the financial strength of the business entity .

The estimated maximum sustainable indebtedness is calculated on the basis of publicly available financial statements of a business entity, except for entities in certain sub-activities of the financial sector, where due to the speciality of their activities is not calculated. It may vary during the year, taking into account the risk of payment default, estimated with S.BON AJPES credit rating model, as well as between the years due to changes in business results or balance sheet structure. Methodology considers several factors including the ability of repayment of financial liabilities based on the generated cash flow from operations, capitalization and assets of a business entity. Known financial liabilities are taken into account, without any off-balance sheet records (guarantees, etc.). Financial liabilities to shareholders or other related parties are treated as any other financial liabilities. The maximum sustainable indebtedness of business entity is 0 in the case of negative equity capital.

¹ *Credit rating score based on unaudited financial statements for the year Company is obliged to submit audited financial statements for the year according to Article 57 of the Companies Act (ZGD-1). Auditor's opinion is considered for recalculated credit rating score during the year.*

² Clarification of the change of credit rating score:

- occurrence of a payment default event in the company and/or group: initiation of bankruptcy, compulsory composition or compulsory liquidation procedure.
- deterioration of the company/group short-term solvency status: inability to pay court-enforced and tax-authority debt collection by seizure of funds on transaction accounts, bill of exchange protest etc.
- based on the auditor's opinion

³ Outstanding liabilities in accordance with the Tax Procedure Act and Enforcement and Securing of Civil Claims Act.

A. KEY DATA OF THE COMPANY

Company name	Podjetje d.o.o.
Address	Ulica 1, 1000 Ljubljana
Web address	www.podjetje.si
